

A clear plastic inline cleaner device is shown installed in a pipe. The device has a cylindrical body with a circular top cover and a square base. A white handle is attached to the top cover. The device is connected to a grey pipe on the left and a black pipe on the right. The background is a light-colored wall with a metal fastener.

FLOW-PLUS™ INLINE CLEANER

About DiversiTech

DiversiTech Corporation is North America's largest manufacturer of equipment pads and a leading manufacturer and supplier of components and related products for the heating, ventilating, air conditioning, and refrigeration (HVACR) industry.

Headquartered in the Atlanta, GA metropolitan area, DiversiTech manufactures a suite of products which includes a wide range of mechanical, electrical, chemical, and structural parts for HVACR and electrical systems, and swimming pool installations. The company maintains manufacturing and distribution facilities in key U.S. locations, Europe, and in the Far East. DiversiTech has enjoyed a continued history of successful growth and has acquired industry-recognized names including Devco® Enterprises, Wagner® Manufacturing, The Black Pad®, Hef-T-Pad™ and Specialty Chemical.

Features and Benefits of the Flow-Plus™ Inline Cleaner

The Flow-Plus™ Inline Cleaner is the newest way to help maintain condensate flow and prevent drain line problems.

The Flow-Plus™ Inline Cleaner installs in the 3/4" condensate drain line to maintain steady condensate flow and pump operation. Its unique design allows Flow-Plus™ tablets to dissolve slowly, maintaining condensate flow for up to six months.

The Flow-Plus™ Inline Cleaner is easy to install and takes just minutes. Condensate water flows into the Flow-Plus™ Inline Cleaner and slowly dissolves the Flow-Plus™ cartridge. The addition of Flow-Plus™ into the drain line or condensate pump prevents build-up of organic material and prevents clogs. This helps prevent damage to the installed equipment and prevents problems before they start. The user replaceable pack of four Flow-Plus™ tablets lasts up to 6 months.

The Flow-Plus™ Inline Cleaner also prevents fouling of condensate pumps from algae or slime build-up in the tank or float, and it reduces the risk of costly repairs by maintaining steady condensate flow. And it's a great add-on sale or addition to season maintenance packages.

The Flow-Plus™ Inline Cleaner also works great with ClearVue tube so you can see what's happening inside the drain line.

The Flow-Plus™ Inline Cleaner offers these great benefits:

- *Slowly releases Flow-Plus™ into the condensate drain line*
- *Prevents build-up and clogs in drain line*
- *Helps maintain steady condensate flow*
- *Prevents fouling of condensate pumps*
- *Ensures proper operation of equipment.*

Increase your business by replacing the tablet pack every six months during seasonal or maintenance service calls.
